

clinical pharmacy services

Via Care's full-service pharmacy offers a wide range of **medications** and **clinical pharmacy services** for our patients, including specialty pharmacy services for hepatitis C and HIV prevention (PrEP/PEP).

your health, your way

PHARMACY

Via Care's Pharmacy provides low-cost medications to our patients. An in-house pharmacy brings more accessibility to our patients so they can get their prescriptions on time and at their own community clinic in East Los Angeles.

CLINICAL PHARMACY SERVICES

Chronic Disease Management services include one-on-one appointments with a Via Care pharmacist to help patients better understand their chronic condition, get instructions on medication use, and learn how to improve their health through lifestyle changes.

Medication Management services include a personalized care program for each patient. The individualized program is developed by a Via Care pharmacist to ensure the proper use of prescribed medications and to prevent adverse drug events.

Diabetes Education, offered by a Via Care pharmacist, includes individual and group education on nutrition, exercise, self-monitoring, and medication adherence. The purpose of this education is to improve overall health and reduce diabetes-related complications, such as foot ulcers, vision impairment, heart disease, and kidney disease.

Specialty Pharmacy services include medications and medical services to treat hepatitis C and prevent HIV (PrEP/PEP). Patients taking medications for hepatitis C and HIV prevention have access to our concierge case management program.

The **mission of Via Care** is to support and uphold our community's right to health by providing quality, equitable, and comprehensive care.
